

Research weekend Presentations: Index and short summary (Total running time: 12.2 hours)

File Name	Author	Title	Length	Summary
Introductions.mp4	All		20:01	Short introductions by pairs
presentation 1.mp4	Jeff Boccaccio	BMR with FOREX	53:20	Blended monthly rebalancing applied to FREX pairs and currency ETFs. Good insights into research process and the importance of individual confirmation of systems
presentation 2a.mp4	Kim Andersson	"Bounce Trading System, part 1	44:40	Great practical discussion of the learning process, the craft of trading, the importance of beliefs, and what it means to "internalize a system, make it fit you"
presentation 2b.mp4	Kim Anderson	"Bounce Trading System, part 2	54:41	Continuation, includes presentation of ruleset
presentation 3.mp4	Bill Scheidt	BMR Update	26:21	An update of Boll's research work on BMR system as applied to his own trading accounts
presentation 4a.mp4	Jacek Sobieraj	RLCO & Renko charts trading	45:15	Excellent update on Jacek's work to incorporate Renko charts in his RLCO strategy application. How to develop a personalized trading plan
presentation 4b.mp4	Tony DeQuick	Mechanized Frog Project	1:28:27	An amazing presentation on systematic testing and exploration of the mechanical frog systems; with key insights into discovering robustness and identifying great candidates for frog trading. Systematic exploration of various permutations of variables, using massive data sets. Systems developers should study this one in great detail
day 2 intro.mp4			8:31	
presentation 5.mp4	Rick Wize	Trading forward with the Quick Frog project	15:43	Rick describes learning a lot about trading the Quick Frog system in his discussion of how he experimented with different combinations of rule sets to examine exit variations, and what he learned by being systematic, and approaching the project as a "researcher"
presentation 6.mp4	Mark McDowell	Trade Station bundles demonstration	31:02	Great discussion of systematizing and simplifying trade frame "preparation" through the use of automation
presentation 7.mp4	Rod Logan	Personal trading plan with swing trading	32:59	Applying RLCO and other Tortoise concepts to swing trading to ratchet up his performance in swing trading. Good discussion on adapting systems to your available time and personal strengths
presentation 8.mp4	Gil VanSciver	Train volatility ETFs with an RLCO framework	53:10	Excellent discussion of Gil's work to systematize his trading style and prepare for career transition after retiring as a veterinarian
presentation 9.mp4	Sonal Darbar	RLCO pattern 1 "by the stats"	1:15:56	Excellent systematic look at Pattern 1 in the RLCO, and an examination of the importance of beliefs, assumptions and

				documenting results in your learning journal. Includes extended whiteboard session from Ken
presentation 10.mp4	Tim Clark	Multiple Swing Trading Systems using RLCO	48:10	Demonstrates convincingly that using the Risk-Z indicator to describe and classify short term market conditions is a powerful way to add performance to swing trading using the RLCO framework. I ALWAYS use these insights in all of my swing trading
presentation 11.mp4	Joey Hanachian	RLCO & Frog Trading Journal	38:29	Update on Joey's personal trading development, based on analysis of his trading journal and performance stats. Using intraday Fro and LCO systems, this reflects a systematic approach o process improvement
presentation 12.mp4	James Nuernberg	BMR in the Time of the Bear	38:51	Update on James' research into improvements possible for the BMR system during Bear markets
presentation 13.mp4	Kyle Conner	Swinging with Momentum	18:43	A novel approach to increasing swing trade performance by applying momentum conditions, as described by regression lines. Strong connection between Kyle's objectives, design choices, and implementation strategies. Another in the series of "How to adapt key concepts you own personal trading styles and beliefs.
presentation 14.mp4	Bill Long, Jr	Golden Nuggets	13:31	Bill's personal integration of the prep work for the workshop, he experiences gained from hearing other traders' journeys, and his own application to "the act of trading". Incorporates powerful metaphors and models from his professional life as a nurse to help lock in his learnings
presentation 15.mp4	Marcus Aviles	A personal model...	13:00	Exploring the psychological dimensions of Marcus' personal trading style, as mapped to RLCO patterns and Frog rulesets

Research weekend Supporting files: Index and short summary

Trading Plan - short and sweet.docx	Kyle Conner	
Trading Price Action - A set of beliefs.pptx	Mark McDowell	
Trading Strategy ESS41X (2).docx	Dave Clews	
Trading Volatility ETF's with a RLCO Framework.pptx	Gil VanSciver	
Workshop Presentation R Wize Quick Frog w Appendix.pptx	Rick Wize	

Additional Trading Lessons from the Live trading week that followed the Research weekend:

1. 87 mini-lessons, comprising over 5 hours of video lessons featuring all aspects of Tortoise-style intraday trading
2. Strategies and systems demonstrated in live trading include:
 - a) The Frog system (all forms: quick frog, slow frog, leapfrog, hybrid frog)
 - b) The 7 patterns of the RLCO system
 - c) Using Frog boxes and the Rangestat to frame intraday trades
 - d) Using the Regression Line fractal Framework to frame intraday trades
3. Includes mini-lessons concerning these core Tortoise concepts: *See the Glossary for details)
 - a) Planning, preparing, executing, assessing
 - b) After action reviews
 - c) Trade framing with reward:risk ratio
 - d) Continuation patterns
 - e) "Failure to fail further" and "Failure to follow through"
 - f) Support & resistance; High of Day and Low of Day
 - g) The Zeno stop
 - h) The 2R Battledrill
